
Personal Electronic Devices and Social Media - Staff

A “personal electronic device” is a device, not issued by the school, that is capable of electronically communicating, sending, receiving, storing, recording, reproducing and/or displaying information and data.

Staff possession or use of personal electronic devices on school property, in school facilities during the work day and while the staff is on duty in attendance at school-sponsored activities may be permitted subject to the limitations set forth in this policy and consistent with any additional school rules as may be established by the administrator or designee. At no time, whether on duty or off duty, will a personal electronic device be used in a manner that interferes with staff duty and responsibility for the instruction and supervision of students, or in a manner that violates state and federal law.

Personal electronic devices shall be silenced during instructional time, while on duty, or at any other time where such use of the device would cause a disruption of school activities or interfere with work assignment. Devices which have the capability to take photographs or record video or audio shall not be used for such purposes while on school property or while a staff member is on duty in school-sponsored activities, unless for a use directly related to and consistent with the employee’s assigned duties.

Staff members, while on duty and off duty, will utilize social media websites, public websites and blogs, judiciously by not posting confidential information about students, staff or school business.¹ Staff may not post images of school facilities, staff, students, volunteers or parents without written authorization from persons with authority to grant such a release. Staff members, while on duty and off duty, will treat fellow employees, students and the public with respect while posting on social media websites, etc., in order to prevent substantial disruption in school. Communication with students using personal electronic devices will be appropriate and professional. Communication with students using personal electronic devices regarding non-school related matters is discouraged.

¹ Nothing in this policy is intended in any form to limit the right of employees to engage in protected labor activities via the use of social media.

Social media tools² may be used by staff in a manner that supports the instructional and learning environment.

Exceptions to the prohibitions set forth in this policy may be made for health, safety or emergency reasons with administrator or designee approval.

Staff are subject to disciplinary action up to and including dismissal for using a personal electronic device in any manner that is illegal or violates the terms of this policy or administrative regulation.

The taking, disseminating, transferring, or sharing of obscene, pornographic, or otherwise illegal images or photographs, whether by electronic data transfer or otherwise (commonly called texting, sexting, emailing etc.) may constitute a crime under state and/or federal law and will be reported to law enforcement and/or other appropriate state or federal agencies.

PBCCS will not be liable for loss or damage to personal electronic devices brought to school property and school-sponsored activities.
